Installation Guide

Hint: The installation methods below are only for reference.
Please refer to products manual for detailed installation.

The projection screen should be installed in the location of the best perspective for the audiences. When screen fully rolled out (hanging-type), the bottom can not be higher than heads of audiences. There are two ways to install. It can be installed on the wall (hanging-type) or on the ceiling (ceiling-type).

Sketch Maps for Ceiling Installation

Operation Guide

◆ Unfold projection screen (Figure 1)

The projection screen has its own unique self-locking device. The screen would contract upward slightly, then stop and lock in the selected position automatically if you pull the hand ring, pull the screen slightly and stop at the required height, then let go.

◆ Retreat projection screen (Figure 2)

Retreating projection screen: Self-locking system would reposition if you pull downward the screen and pull gently. Slightly grab the hand ring and let it go until all screens return to screen housing.
