Installation Guide

For the installation manual, please refer to the manual.
 Please refer to the manual for detailed operation.

The projection screen and video projector should be installed in the position of the wall perspective for the audio-visual presentation. Fully rolled out. (For the type of the bottom mesh or the right-hand side of the audience.) Please refer to the manual for the correct way. (For the type of the top mesh or the left-hand side of the audience.)

Operation Guide

○ Unfold projection screen (Figure 1)

The projection screen has its own unique self-locking device. The screen would contract upward slightly, then stop and lock in the selected position automatically if you pull the hand ring, pull the screen slightly and stop at the required height, then let go.

○ Retreat projection screen (Figure 2)

Retreating projection screen: Self-locking system would reposition if you pull downward the screen and pull gently. Slightly grab the hand ring and let it go until all screens return to screen housing.
